Portugal

December 2015

This document reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

This project, and this document, has been funded with support from the European Commission.

Basis for Mentors' Network

This Network consists of experts from the various European regions that participated in the FIERE project, who, based on the material already developed by the FIERE project and their own professional capabilities and expertise, have expressed an interest to be willing to consider requests for assistance from organisations in the public and voluntary/community sectors relating to new innovative and entrepreneurial approaches for the betterment of their operations and service delivery in the regions and local areas.

The expression of interest by any of these mentors, its acceptance and the publication of their name and contact details in this network by the FIERE partnership, does not, in any way, imply an unconditional offer of mentoring services to organisations which may make a request for assistance. Conditions for actual provision will primarily depend on the availability of the individual mentor and the specific needs of the organisation and conditions under which such services may be provided, and it is entirely at the mentor's discretion to provide any assistance/advice sought.

An organisation making a request for assistance/advice should do so directly to the mentor.

The FIERE project, and its individual partner organisations, does not have any role or responsibility in relation to any request for assistance made by any organisation and to any provision of services by a mentor. Such matters are entirely between the organisation making the request for the services and the mentor to whom such request is made.
